

Video microscope for easier MTP®/MPO inspection

The DI-1000MPO+ incorporates the same features and uses the same single fiber tips and accessories as the popular DI-1000, but adds additional X- and Y-direction scanning knobs. This allows the user to manually scan in both the X and Y directions with one hand, providing unprecedented control and increasing the efficiency of inspecting the endfaces of MTP®/MPO connectors. No additional MTP/MPO tips are necessary to inspect one to four row (12 to 48 fibers) MTP/MPO connectors.

The scanning knobs also provide further flexibility when inspecting single fiber connectors. The included single fiber adapter enables you to use any Lightel Series 2 tip with the DI-1000MPO+ and quickly adjust the image position.

Features

- Shift the image position without moving the probe
- Connect by USB to Windows PC or to iPhone and Android by optional WiFi adapter
- Scan across MTP/MPO connectors with one hand
