

## MULTIMODE COMPONENTS

# (6+1)x1 High Power Pump and Signal Combiners

Optimized for Counter-Pumped Laser Designs

ITF Technologies' High Power Multimode Pump and Signal Combiners feature exceptional optical performance. These devices can be used to combine the power from several multimode laser diodes with a signal feed into a double clad fiber (DCF). These combiners are designed to address industrial and research applications.

ITF Technologies' High Power Multimode Pump and Signal Combiners also offers very efficient pump power transmission in applications such as fiber lasers and fiber amplifiers, with the best signal quality transmission. They are designed to meet a wide range of power handling configurations and a large selection of input/output fiber types.

### KEY FEATURES

High Power Transfer Efficiency

Preservation of Modal Content

Wavelength Insensitive

Custom Configurations Available

ROHS Compliant

Can also be used in a co-pump configuration

### APPLICATIONS

Fiber Lasers

Fiber Laser Seed Amplifiers

Fiber Laser Power Amplifiers

Industrial & Research

√: Product available - product code not yet defined

**PACKAGE DIMENSIONS**

High Power: 60.0 x 12.0 x 6.5 mm

Signal optimized for fundamental mode transmission:

Typical <0.5 dB fundamental mode loss

Maximum pump insertion loss per port: 0.5 dB (typical)

Optical return loss: > 35 dB

PER value of PM components: >20 dB

Typical power handling presented

**Custom designs and prototypes also available**
