# LiBackpack C50

Mobile Handheld 3D Mapping System

## LiBackpack C50 Mobile Handheld 3D Mapping System

LiBackpack C50 is an advanced SLAM-based 3D mapping system which integrates LiDAR and 360° imaging technologies to produce true color point clouds. Functional in both handheld and backpack modes, the LiBackpack C50 is a flexible mobile laser scanning solution for indoor and outdoor applications. Users can opt for a LiDAR-only solution when colorized point clouds are not required.

#### **Operational Versatility**

The LiBackpack C50 is functional in both handheld & backpack modes. The Backpack mode allows for a true handsfree experience while the Handheld mode offers a wider FOV.

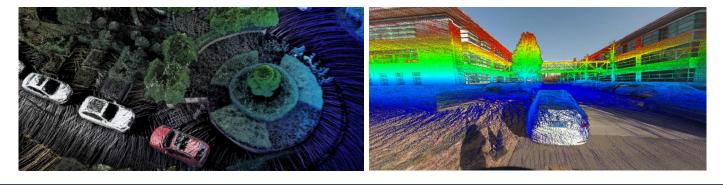

#### **Real-Time Data Visualization**

Visualize the point cloud in real-time via the connected device (wired/wireless). The LiBackpack user interface also displays device status information.

#### **Advanced SLAM Solution**

Robust SLAM algorithms that includes automatic loop closure & a system capable of producing a real-time point cloud.

### **Specifications**

Laser Sensor	Velodyne VLP-16
LiDAR Accuracy	±3 cm
Scan Range	100 m
Data Accuracy	~5cm
Operation & Data Transfer	WIFI connection (mobile phone, tablet) Wired Ethernet connection (tablet)
Onboard Storage	512 GB
Ports Available	HDMI, Ethernet & USB 3.0
Operation Time	~2 hour w/ DJI TB47S battery

Weight	6.2kg
Dimensions	1038*270*147 mm
Typical Ground Speed	1 m/s
Camera	Panoramic Camera
Resolution	4320*2160
Frame Rate	25 fps
Vertical FOV	-15°~ 15°
Horizontal FOV	360°
Point Cloud Format	.las, .ply, .LiData
