OIM101-One Inch FSM

FEATURES:

- Flexure suspension allows stiction free motion of the mirror with an infinite fatigue lifetime
- Built in optical sensor allows the user to monitor both axes of mirror motion
- Moving magnet design allows coils to be heat sunk to the mirror base structure
- New coil design eliminates coil overheating problems, no need to monitor coil temperature
- Uses industry standard 1” x 0.25” (or 1” x 6mm) glass mirrors
- Mirror coating to customer requirements
- Mirror mounted into sub-mount using low out-gassing RTV
- Additional sub-mount available for user installation of mirror
- Wave-front quality 1/10th wave p-v (depends on mirror substrate)
- Useable aperture 0.94”

Model OIM101 features a removable submount which holds an industry standard 1" x 0.25" or 6mm glass mirror substrate with a customer specified reflective coating.

A built in high precision optical sensor monitors mirror angle. The compact optical head is attached to a servo controller using a supplied 6 foot cable. The user inputs analog mirror command to the controller to steer the mirror.
