## Quantum cascade laser driver

Koheron QCL100 is a high－performance current source designed to drive Quantum Cascade Lasers．With a low current noise of 650 $\mathrm{pA} / \sqrt{ } \mathrm{Hz}$ ，the QCL100 driver provides an adjustable compliance voltage up to 15 V at 500 mA and an adjustable precision current limit．The QCL100 driver features a 5 MHz modulation input and a 10 Hz trimming input and is supplied from a single 24 V input．

## Specifications

|  | QCL100－A－500 |
| :--- | :--- |
| Laser current | $0-650 \mathrm{~mA}$ |
| Supply voltage $\mathrm{V}_{\mathrm{S}}$ | $19 \mathrm{~V}-26 \mathrm{~V}$ |
| Compliance voltage | 15 V at $500 \mathrm{~mA}(13.5 \mathrm{~V}$ at 650 mA$)$ |
| 3 db modulation bandwidth | 5 MHz |
| Current monitor gain | $2 \mathrm{~V} / \mathrm{A}$ |
| RMS noise（10 Hz－ 1 MHz$)$ | 680 nA rms |
| Current noise density $(1 \mathrm{kHz})$ | $650 \mathrm{pA} / \sqrt{ } \mathrm{Hz}$ |
| Modulation gains | $10 \mathrm{~mA} / \mathrm{V}, 50 \mathrm{~mA} / \mathrm{V}$ |
| Operating temperature | $0{ }^{\circ} \mathrm{C}-50{ }^{\circ} \mathrm{C}$ |
| Outside Dimensions | $100 \mathrm{~mm} \times 68 \mathrm{~mm} \times 16 \mathrm{~mm}$ |
| Compatible lasers | Anode－grounded／Floating diode |

## Characterization

## Current noise

Current noise is measured across a $25 \Omega$ resistor (VSET set to -13.9 V ). Integrated noise in the $10 \mathrm{~Hz}-1 \mathrm{MHz}$ bandwidth is $653 \mathrm{nA}_{\mathrm{rms}}$.

## Modulation

The modulation transfer function of the QCL100 driver was measured across a $25 \Omega$ load at 400 mA (VSET set to -14.5 V ) with a modulation input amplitude is $2 \mathrm{~V}_{\mathrm{pp}}$ :

The gain at half the optical bandwidth is 6.9 MHz (in low gain) and 5.9 MHz (in high gain). A phase-shift of $90^{\circ}$ is reached at 2.6 MHz (in low gain) and 2.3 MHz (in high gain).

The figure below shows the response (yellow) of the QCL100 driver to a $2 \mathrm{~V}_{\mathrm{pp}}$ triangle modulation (green):

## Current limit

The QCL100 driver integrates a fast and precise current limit. Here the current limit clamps a 10 kHz sine wave at 400 mA :

## External setpoint trimming input

The external trimming input can be use to perform a low frequency modulation with a 10 Hz bandwidth.
