

Ruggedized Connectors

for demanding applications and harsh environments

- Protected against water and dust (IP68 Ingress Protection Rating)
- Wide range of operating temperature -40°C/+70°C
- Chemical resistance
- Exceed ODVA requirements
- Applicable to outdoor installation and harsh environments
- Custom solution

SQS Vlaknova optika offers low cost rugged fiber optic connectivity solutions that ensure resistance to bad weather and harsh environment thus they are ideal for outdoor installation such as the Fiber to the Antenna (FTTA) concept or security technology. This product line includes connectors, bulkhead receptacles, distribution boxes, cable drums and UV light resistant cables with flame retardant jacket.

SQS ruggedized connectors and adapters are provided in a plastic version as well as in a metal one that is even more durable and are available with or without end caps. They features a standard bayonet locking system that ensures easy, quick and reliable connection and allows mating to other similar mechanical locking systems. SQS fiber optic cable assemblies are manufactured and tested to the most rigorous industry standards and their optical and mechanical performance meets IEC, CENELEC and Telcordia specifications.
